

SPECIALIZED DEEP CLEANING SERVICES

Cleaning for the CORONA Virus is not that different from cleaning or disinfecting for any other virus like common cold or flu. There is no universal deep clean protocol and none of the regimes put in practice are perfect. The term “deep cleaning” has different meaning for different businesses and thus the application of cleaning practices varies from customer to customer and facility to facility.

Department of Health and Human Services (DHHS) has developed a fact sheet to document cleaning guidelines to help prevent the transmission of COVID-19 through the cleaning activities. As per the DHHS, any deep clean regime put in practice must ensure that,

- Ensure staff is trained
- Use two-step process,
 - Clean
 - Disinfect
- Use commercial disinfectant with viricidal label or listed TGA product
- NO Fogging
- Workplace risk assessment
- Monitoring, perform completion checks
- Remove clutter
- Develop cleaning schedules
- PPE
